PROFILE

Software Developer with 1+ years of professional experience in backend and full-stack development, specialising in building scalable, secure, and efficient applications. Strong experience in software development life cycle (SDLC), Agile methodologies, API development, testing, debugging, and system optimisation. Hands-on experience with Python (Django), Java (Spring Boot), PHP (Laravel), and React, along with DevOps practices including CI/CD pipelines, Docker, and Linux environments. Passionate about automation, workflow-based solutions, Artificial Intelligence (AI), Machine Learning (ML), and data-driven technologies, with the ability to quickly learn and apply new tools.

EDUCATION

- Diploma in Computer Systems Engineering** 2016 - 2020
Tshwane University of Technology
- NQF Level 5 Software Development** 2021 - 2022
WeThinkCode_

PROFESSIONAL EXPERIENCE

DevOps Engineer L1 — Wipro (assigned to FNB) SEP 2025 - PRESENT

- Manage day-to-day CI/CD pipeline health: investigate & resolve common build/test/deploy failures.
- Create/maintain Bash/Python scripts to remove repeated manual steps and speed up feedback loops.
- Support deployments across DEV and QA; assist with pre- and post-deployment verification checks.
- Collaborate with developers/testers to troubleshoot configuration issues and integration errors.
- Contribute to DevOps documentation (runbooks, standards) and reusable pipeline components.
- Exposure to containerized workloads and OpenShift-based workflows in enterprise environments.

PHP Backend Developer — Mukuru

MAR 2023 - FEB 2024

- Built and maintained backend services in PHP (Laravel), focusing on reliability and security.
- Integrated third-party APIs for financial transactions; optimized SQL queries for performance.
 - Used Git for version control and supported Linux-based deployments.
 - Collaborated with cross-functional teams to diagnose and resolve production issues promptly.

CORE SKILLS

- DevOps & CI/CD: Jenkins, GitLab CI (exposure), Git, GitFlow, build optimization, release orchestration
- Containers & Cloud: Docker, Red Hat OpenShift (exposure), Kubernetes (exposure), AWS S3 (static hosting)
- Monitoring & Troubleshooting: Log analysis, pipeline health monitoring, failure triage & root-cause analysis
